What Is Meridian Cleansing? (Traditional Energy Healing Explained)

Meridian cleansing is a deeply restorative traditional therapy based on the body's energy channels — called *meridians* in Traditional Chinese Medicine and *Nadis* in yogic philosophy. These pathways circulate life-force energy (Qi/Prana) throughout the body. Due to stress, emotional pressure, trauma, irregular lifestyle, or spiritual imbalance, these pathways often become blocked.

Blocked meridians may cause:

- Chronic fatigue and low energy
- Anxiety, stress, and emotional heaviness
- Poor sleep or restlessness
- Muscle tension, headaches, or stiffness
- Weak immunity and frequent illness
- Difficulty focusing or mental fog

Our **singing bowl meridian therapy in Kathmandu** uses precise sound frequencies to break up these blockages and restore the natural flow of energy through the meridian lines.

Why Himalayan Singing Bowls Are Powerful for Meridian Healing

Authentic **Himalayan sound healing bowls** emit deep, grounding vibrations that resonate through your body's physical tissues and subtle energy field. These waves of sound enter the meridian system, releasing stagnation and encouraging realignment.

Sound Healing Effects Backed by Research:

- Activate the [parasympathetic nervous system](#) (deep relaxation)
- Reduce cortisol (stress hormone)
- Improve circulation and energetic flow
- Calm the limbic system (emotional brain)

This makes singing bowls one of the most effective tools for **vibrational healing, chakra balancing, and meridian cleansing**.
