Frequently Asked Questions

What is Feet Reflexology, and how does it work?

Feet Reflexology is a natural therapy that involves applying pressure to specific reflex points on the feet. These points correspond to organs and systems throughout the body. When stimulated, they help improve blood flow, release tension, and restore balance to your entire system.

How is Feet Reflexology different from a regular foot massage?

While a foot massage focuses mainly on muscle relaxation, **reflexology targets precise reflex zones** connected to body organs and glands. It's a holistic healing approach designed to improve overall wellness, not just relieve tired feet.

What are the benefits of Feet Reflexology in Kathmandu?

Feet Reflexology helps reduce stress, relieve muscle pain, improve circulation, ease anxiety, promote better sleep, and increase energy levels. Many people in Kathmandu also find it effective for recovery after trekking or yoga practice.

How long does a typical Feet Reflexology session last?

A standard session at the **Institute of Natural Medicine in Thamel** lasts about **1 hour**, including a short consultation to personalize the treatment to your needs.

Can Feet Reflexology help with insomnia and stress?

Yes, it's one of the best natural therapies for **relieving stress and improving sleep quality**. Reflexology helps calm the nervous system, release endorphins, and create a deep sense of relaxation.

Is Reflexology safe for everyone?

Feet Reflexology is safe for most people, including seniors and those recovering from fatigue or injury. However, people with serious foot injuries, infections, or certain health conditions should consult a doctor or therapist before treatment.

Does Reflexology hurt?

Not at all. The pressure applied during reflexology is firm yet gentle. Some areas may feel sensitive if they relate to tension in a specific organ, but the sensation quickly eases as balance is restored.

How often should I get Reflexology treatments?

For general relaxation and stress management, a **weekly or bi-weekly session** works best. For chronic issues or recovery, your therapist may recommend a personalized plan. [Get in touch](#) with

our professional therapist for consultation regarding Feet Reflexology session in Thamel.

Can Reflexology help after trekking or hiking in Nepal?

Absolutely! Many trekkers book a **post-trekking foot reflexology session in Kathmandu** to relieve soreness, stiffness, and fatigue after exploring trails like Everest Base Camp or Annapurna Circuit. We also facilitate [Trekkers' Holiday Recovery Massage](#) at INM.

What can I expect during my first Reflexology session?

Your therapist will first ask about your health and lifestyle. You'll then relax in a comfortable chair or bed while gentle pressure is applied to reflex points on your feet. The session ends with soothing strokes that enhance energy flow and relaxation.

Are oils used during Feet Reflexology?

Yes, natural herbal oils are used to nourish the skin and enhance relaxation. At the **Institute of Natural Medicine**, we use warm, aromatic oils infused with calming herbs for deeper therapeutic effect.
