Singing Bowl Massage

Singing Bowl Massage - 75 Minutes (USD 25)

If your body feels tense, your mind scattered, or your energy heavy, a **Singing Bowl Massage** offers a scientifically supported way to reset your system. This 75-minute session blends Himalayan bowl vibration, localized resonance therapy, and mind-body relaxation techniques, allowing sound waves to move through your muscles, tissues, and subtle energy field. At the **Institute of Natural Medicine (INM) in Thamel, Kathmandu**, this treatment is performed using hand-hammered Himalayan bowls placed directly on—and around—the body, creating a deeply grounding and therapeutic experience that costs only **USD 25**.

What Is a Singing Bowl Massage?

Unlike a general sound bath where bowls are played around you, a singing bowl massage uses *direct vibrational contact*. The bowls are placed on specific areas of the body—back, shoulders, abdomen, feet, and energy centers—and played in rhythmic patterns. The vibrations travel through tissues and fluid pathways, producing a gentle internal massage effect that supports neurophysiological balance and emotional regulation. Studies indicate measurable benefits from such vibrational therapies.

Why People Choose Singing Bowl Massage in Kathmandu

Kathmandu—especially Thamel—is known for authentic Himalayan bowl work. INM uses ethically sourced, traditionally crafted bowls that produce complex harmonic overtones ideal for healing. The 75-minute duration allows the body time to shift into a parasympathetic state (the “healing mode”), enabling deeper restoration without intense pressure or deep tissue work.

What Happens During Your 75-Minute Sound Healing Session?

The session is structured to support a gradual nervous-system reset and energetic integration:

1. **Grounding & breath preparation:** short breathwork to settle the nervous system.
2. **Bowl placement on the body:** bowls are placed on targeted areas to deliver local vibration.
3. **Chakra-focused resonance:** the therapist sequences tones to support energetic clarity and flow (this complements our [Aura Cleansing](#) and [Crystal Singing Bowl - 7 Chakra Healing](#) packages).
4. **Surround-sound field therapy:** bowls played around the body to create an immersive vibrational field.
5. **Integration & grounding:** gentle closing tones and grounding guidance to stabilize the nervous system.

Who Benefits Most from Sound Healing Massage?

The therapy suits travelers and trekkers needing recovery, people experiencing chronic tension or anxiety, meditation practitioners seeking deeper states, and anyone who prefers a gentle, non-invasive therapeutic approach. It is also an excellent complement to INM programs such as [Himalayan Sound Healing](#), [Ancient Singing/Sound Healing Course](#), and daily yoga offerings.

Why This Helps Body and Mind?

Physically, the vibrations help release chronic muscle tension, support circulation, and soothe the nervous system. Mentally and emotionally, the sound encourages the brain to shift into restorative alpha and theta states, reduces mental chatter, and can prompt emotional release. Energetically, the session supports chakra balancing and aura clarity—helping you feel more grounded and open after the treatment.

Preparation & Aftercare | Sound Healing Massage

Wear comfortable clothing and avoid heavy meals 1–2 hours beforehand. Hydrate lightly and set a simple intention for your session. After the massage, drink water, allow quiet time for integration, and consider gentle movement or a short walk for grounding.

Session Details of Singing Bowl Massage
